Passwords are stored using a strong slow irreversible hash, making them virtually impossible to retrieve. They are never logged, and will never be divulged to anyone. However it is good security practice to not use the same password for multiple applications, and to avoid the use of readily guessable passwords.

⊕ **Do I need Javascript enabled in my browser??**

⊖ **How do I submit an entry?**

The basic steps are:

1. From the Main Menu select the Competition Group. This will be e.g. the competitions for a particular season.
2. Select the Competition. You can only submit/change/delete entries when the Competition is Open (see below).
3. Check the number of entries that you are allowed for this Competition. It is shown as "Entries Allowed" on the entry screen. The number of entries varies by Competition and by the class that you are in.
4. Export your images as JPGs. Pay particular attention to the image dimensions, and the colour space (see below). It doesn't matter what the filenames are. You cannot upload a JPG that is larger than 10MB.
5. Click on Add Entry.
6. Supply a Title (watch out for the limited characters you can use), optionally supply a Reference, and select the publishing options and click Save.
7. Upload the correct number of images. This will normally be one per entry, but could be higher (e.g. for a 3-of-a kind competition).
8. Once the messages for the Entry are green, your entry is accepted. You may still have a warning about image dimensions (see below).
9. Add further entries if you want to and have not already reached the limit for your class. The "Add Entry" button will only be visible when the Competition is Open and you are allowed more entries.
